February 10, 2014

**Aerosol Technology, Karlsruhe, Germany
16 – 18 June 2014
Your paper T313A08**

Dear Dr. Heiden,

The AT2014 Organising Committee is very pleased to inform you that your abstract with the title:
About a new nanoparticle mass measurement method in the transition regime has been selected for **Oral** presentation. We have noticed that the presentation speaker will be:
Bernhard Heiden.

Your contribution has been assigned to the Session:
Measurement Techniques & Devices III
and scheduled for **17 June 2014, 10:55 to 11:15** hrs in the **Room 157.**

Please note that the presentation time is 20 minutes in total, i.e. 15 minutes for the talk and 5 minutes for discussion. In view of five Sessions held in parallel and the audience possibly changing from one location to another, the 20-minutes schedule will be observed very precisely.

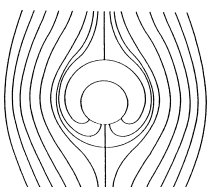

Please report in the conference room during the break before your talk and hand over your power point presentation to the staff. In the conference rooms a presentation PC will be available, but you can use your own laptop for presentation too.

The overall conference programme is now being published on the AT2014 website (www.gaef.de/AT2014).

We are very much looking forward to seeing you in Karlsruhe.

With best regards

Gerhard Kasper
